

# Deltapath® Engage

## Connect to Anyone From Anywhere With a Softphone

Businesses need a communication and collaboration solution that keeps a distributed workforce and a rapidly expanding remote workforce connected. Deltapath Engage is a collaboration softphone for Windows and macOS users that delivers key advantages over other softphones.

### What is a softphone?

Unlike the physical work phones that traditionally sit on office desks, a softphone is a software application you install on a device. Devices with an internet connection, speaker, and microphone such as a laptop, smartphone, or tablet can support a softphone.

### User Benefits

Users gain more flexibility. Make and receive calls anywhere you go with a laptop and internet connection. Video calls and conference calls are also standard features of softphones. Communicating with your entire team is as easy as a one-to-one call.

### Business Benefits

Softphones can replace expensive business desk phones, eliminate provider costs that come with conference call service, and embrace unified communications as employees communicate on one platform.

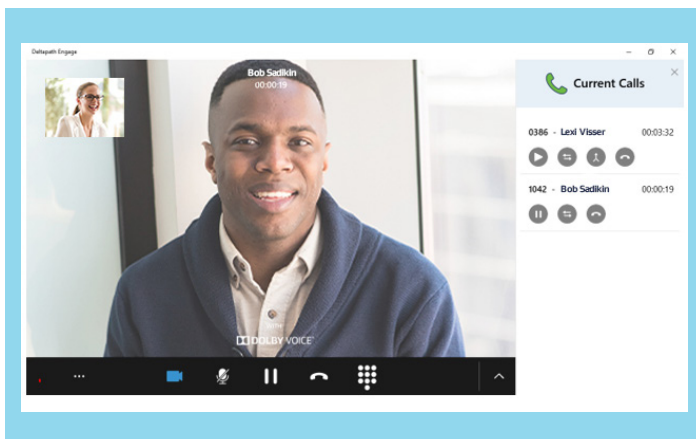

# EXPERIENCE DELTAPATH ENGAGE ON WINDOWS OR MACOS

## Immerse Yourself in Ad-Hoc Meetings

Teams work smarter and more effectively with impromptu multi-party audio conference calls. Users never need to reserve a room, schedule a meeting, or send invites. Instead, ad hoc meetings are built to hold as many participants as your server permits.

## Elevate Communication With Video Calls

Let video calls act as a catalyst for team building and support, not just as a mainstream form for consumer-to-business and business-to-business communication. Deltapath Engage ensures your employees always have a great video experience with different call control rates.

## Easy to Use Interface

The simple to use interface comes equipped with all the essential business phone features you expect when using a desk phone.

## Implementation and Flexibility

All you need is internet access to start using Deltapath Engage on Windows and macOS. Enjoy geographic flexibility. Take Deltapath Engage with you anywhere you take your laptop.

## Want More Options?

Use Deltapath Mobile, our smartphone app, to enjoy video calls and transform your phone into a pocket size audio conferencing device

# Datasheet

## Call Handling Features for Windows and Mac
